

Northwind Analytics — Employee & Product Handbook (2026 Edition)

About the Company

Northwind Analytics was founded in 2014 as a small data-consulting studio and has since grown into a product company. The business is headquartered in Bristol, United Kingdom, at an office located at 42 Harbour Road. The company's mission is to make demand forecasting accessible to mid-sized retailers who cannot afford large in-house data-science teams.

Leadership

The current Chief Executive Officer is Dr. Amara Okonkwo, who joined the company in 2019 after leading analytics at a national logistics firm. The leadership team meets quarterly to review product strategy and company performance.

Our Flagship Product

The flagship product is a demand-forecasting platform called TideCast. TideCast ingests a retailer's historical sales and produces weekly demand predictions, helping stores reduce both stockouts and overstock. It is sold as a subscription and is the company's primary source of revenue.

Time Off and Leave

Full-time employees receive 28 days of paid annual leave each year, in addition to public holidays. Unused leave of up to five days may be carried over into the following year with manager approval.

Remote Work Policy

Employees may work remotely up to three days per week. The company operates a hybrid model, and teams are expected to coordinate at least two shared in-office days for collaboration and onboarding of new joiners.

Health and Benefits

The company health plan is provided through Meridian Health and covers all permanent employees from their first day. The plan includes dental cover and an employee assistance programme.

Expenses

Business expenses under 75 pounds do not require pre-approval and can be claimed directly through the expenses portal. Any single expense above that threshold must be approved by a line manager before it is incurred. Each employee also has an annual training budget of 1,200 pounds for courses, books, and conferences.

Customer Support

Customer support is available Monday to Friday, 9am to 6pm GMT. Support requests are answered by email and live chat, with a target first-response time of four business hours.

Data Security and Retention

All company laptops must use full-disk encryption via SentinelLock, which is installed by the IT team during onboarding. Customer data is retained for 36 months after account closure, after which it is permanently deleted in line with the company's data-protection policy.
